

---

**Good afternoon THEbenefitsHUB Users,**

I want to make you aware of a change being made to your TRS EDI files. As you know, we have a close working relationship with Aetna/Wellsystems. Our management teams meet regularly to discuss how data transfers between our systems can be streamlined to better serve you. This year we've agreed to make some changes that reduce the number of files sent, which reduces processing time and potentially decreases wait times between changes made in **THEbenefitsHUB** appearing in Wellsystems. Here's how this works:

- In years past, we ran two sets of files, one for the current plan year and one for the plans starting September 1st. We would generate a special Between Plan Year termination file that listed any terminated employees or discontinued elections.
- This year, instead of sending all of this information in three separate files, we're combining the data into one file. This new file is set to deliver 8/10/2016 to ensure medical ID cards are processed and sent out on time. For those of you who are curious, it will run every Sunday going forward. Additionally, to take care of your September bill, we will run a special file on 8/23/2016.
- These EDI changes apply to all but one of the TRS groups on **THEbenefitsHUB**.

One more thing! Just in case you didn't know, we are holding a one-hour TRS webinar next week. Please join us as we discuss how **THEbenefitsHUB** helps you manage TRS medical plans and more. (We won't be discussing Wellsystems/Aetna, claims, or coverage specifically in this session.)

Webinar Details:

August 11th, 2016 2:00 PM - 3:00PM CDT
